About the Purdue University

Summary of Previous Research

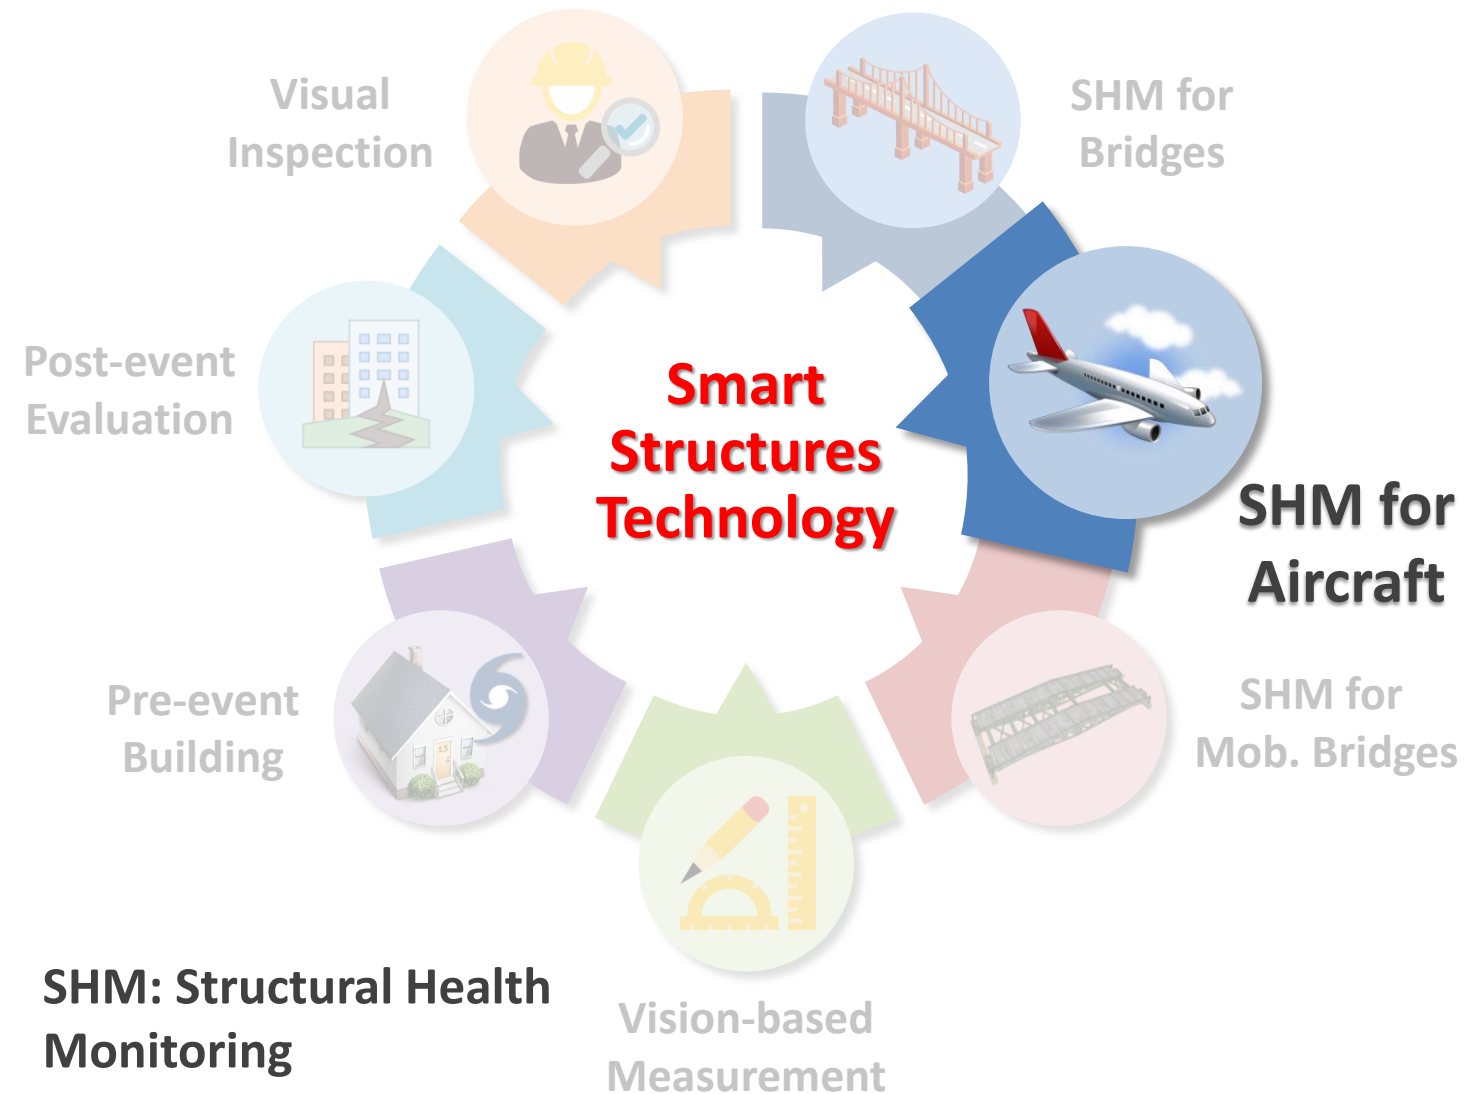

Summary of Previous Research: Nondestructive Testing for Bridges

Instantaneous crack diagnosis system for bridge monitoring

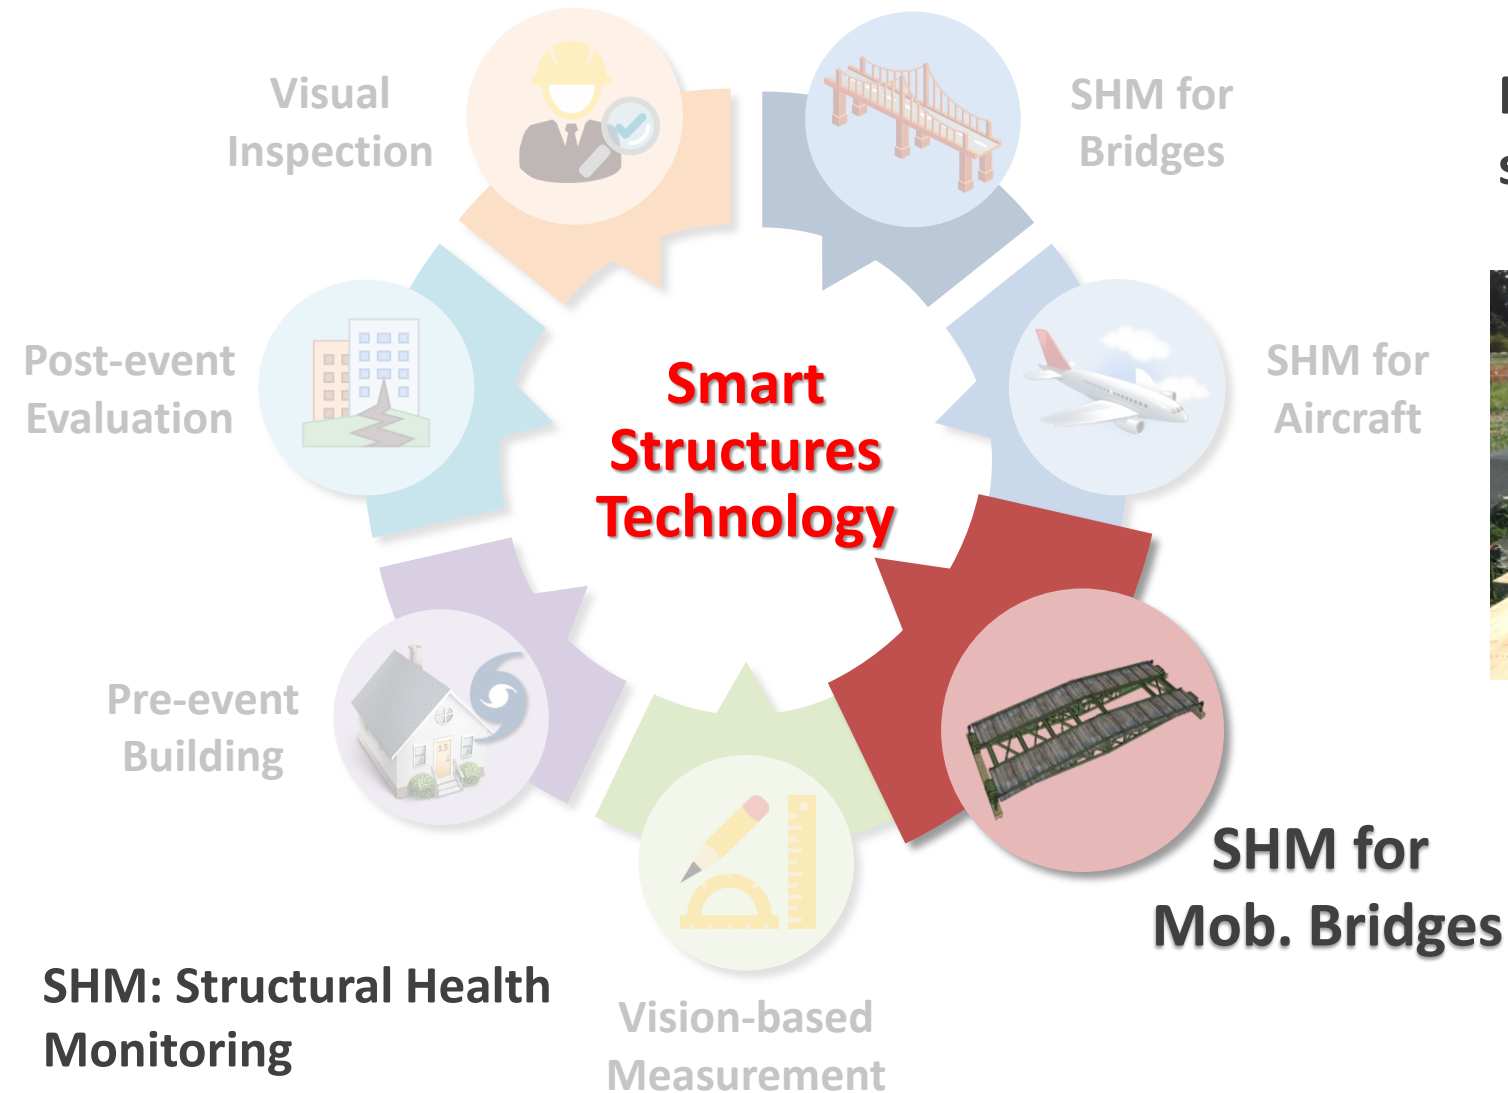

Summary of Previous Research: SHM for Composite Air Vehicles

On-board SHM technology for composite air vehicles

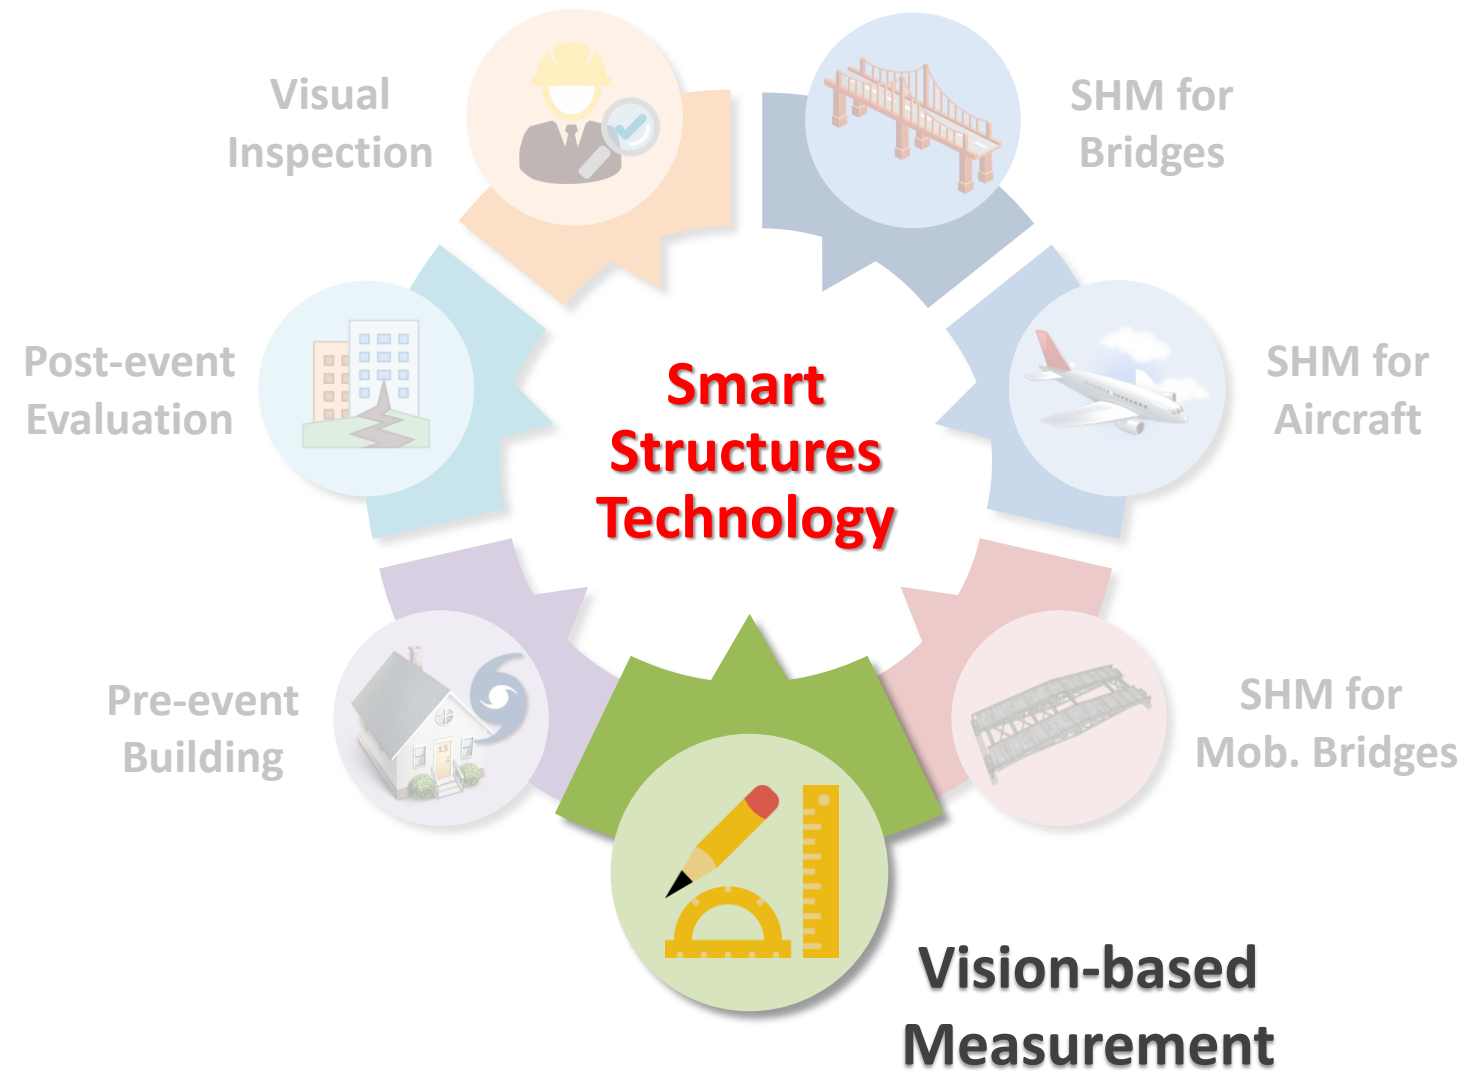

Summary of Previous Research: Mobile Bridge Usage Monitoring

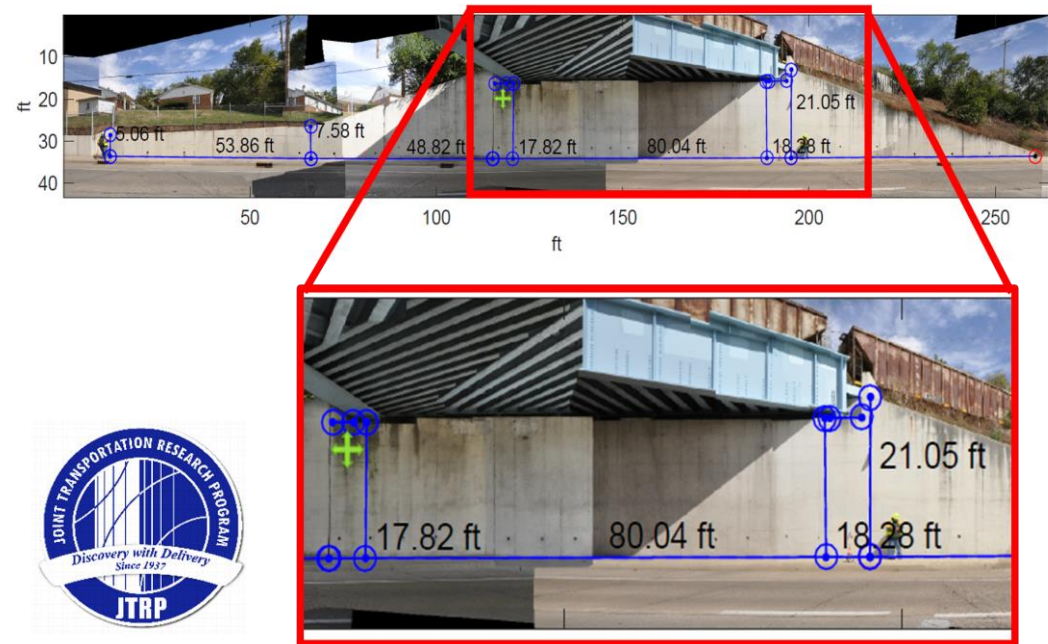

Mobile military bridge monitoring system using sensor network

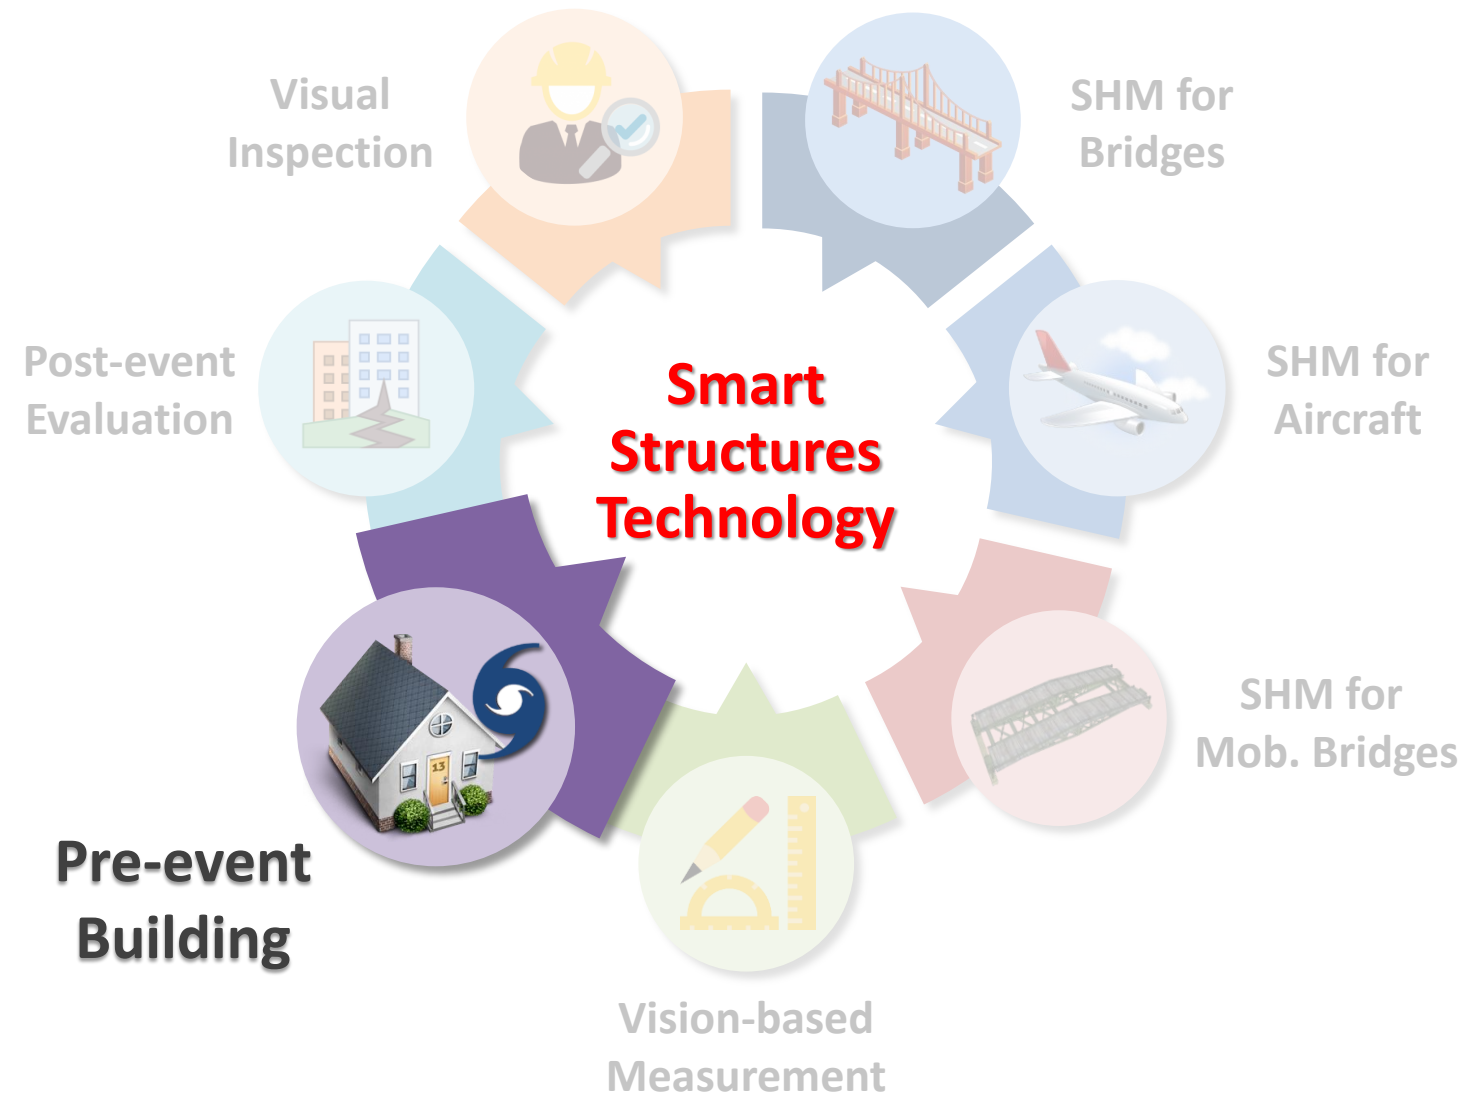

Summary of Previous Research: Vision-based Measurement

Vision-based meas. and documentation for construction pay items

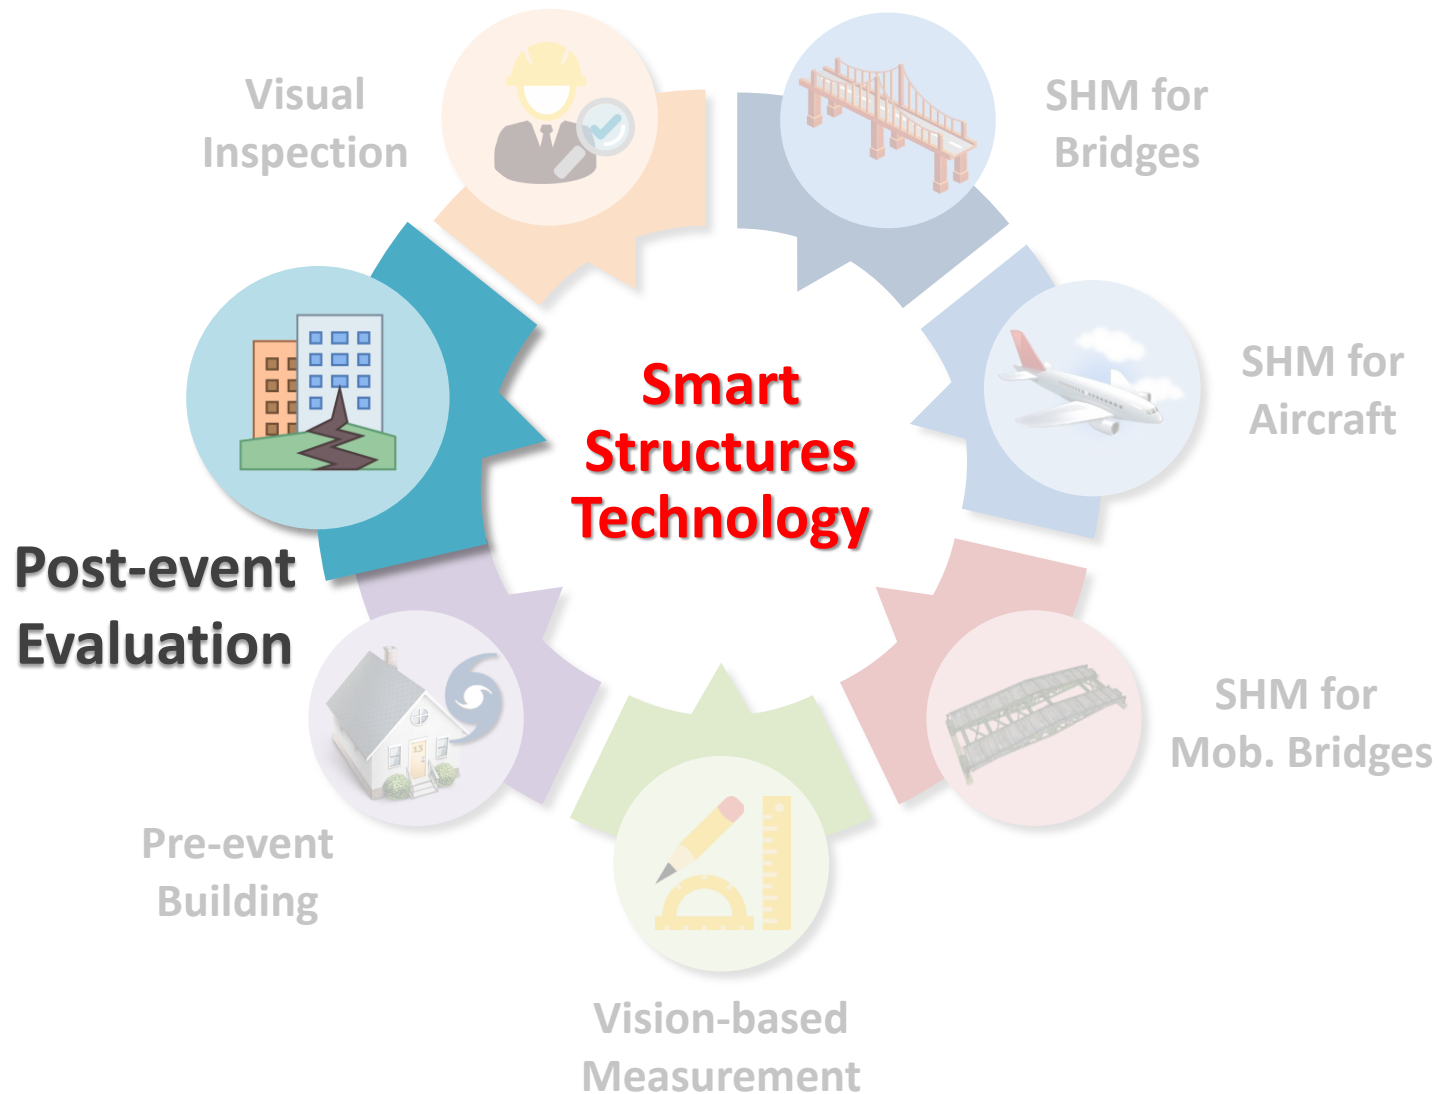

Summary of Previous Research: Building Image Detection from Street View

Automated pre-event building image extraction

Summary of Previous Research: Post-disaster Building Evaluation

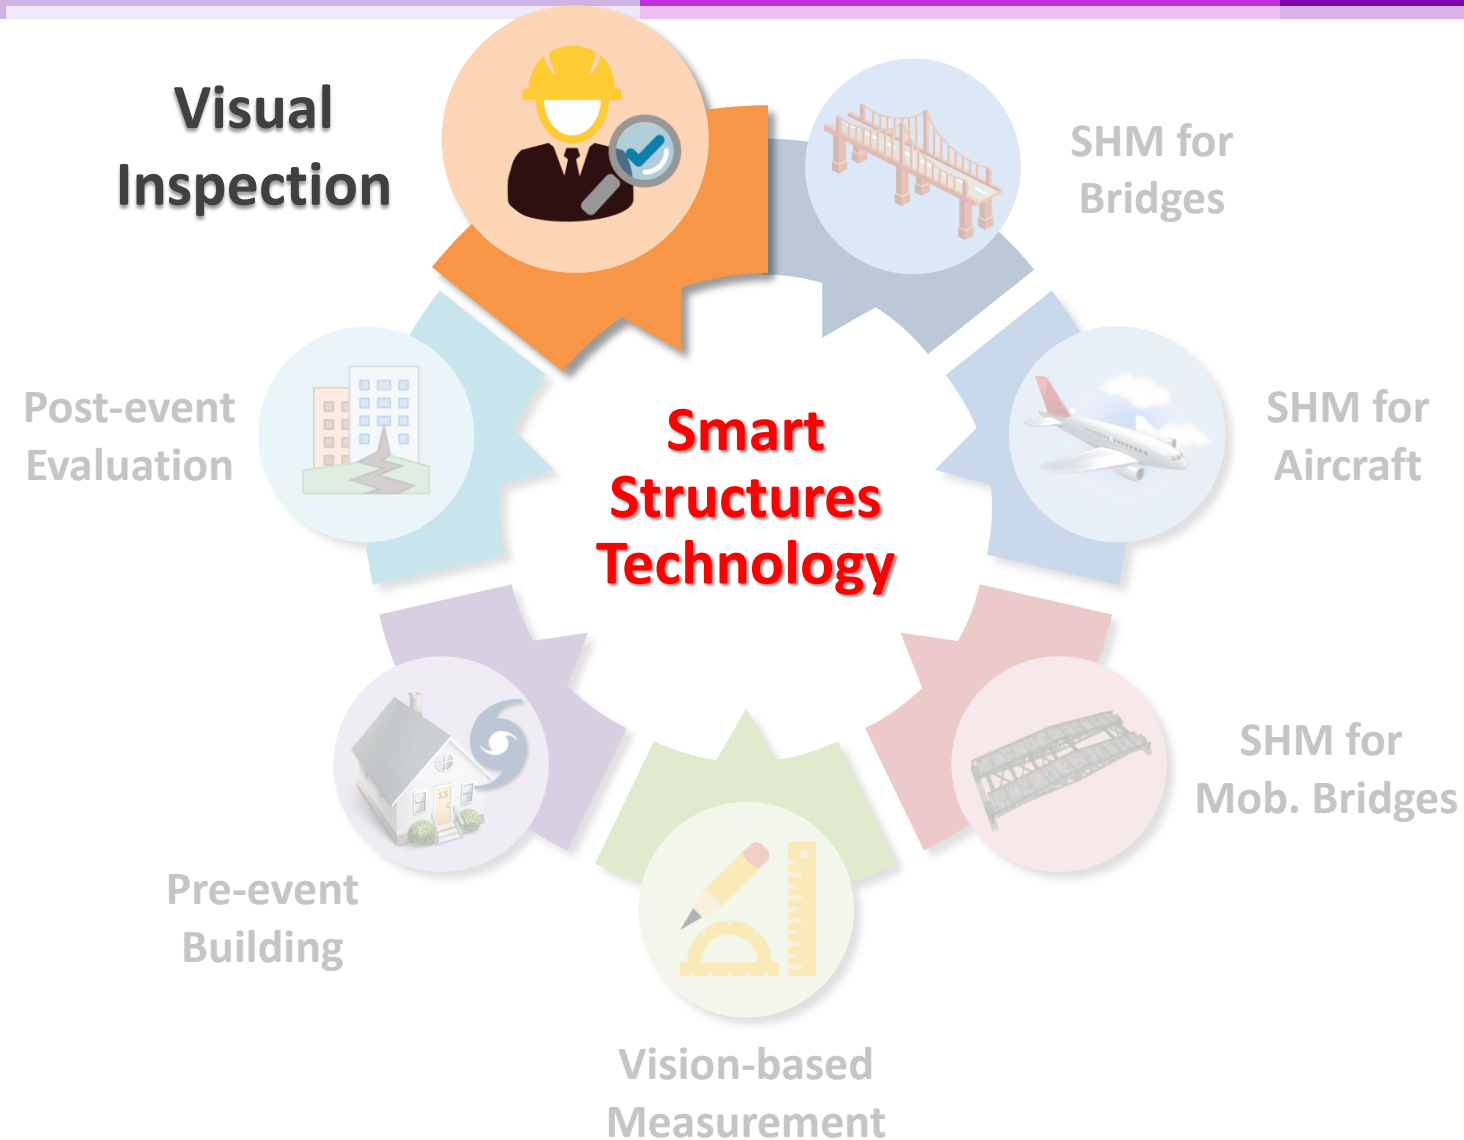

Post-disaster evaluation using visual data analysis

Documentation of Post-Earthquake Reconnaissance Images	
Table of Contents	
• Summary	
• Building and Building Components	
• Outside	
• Inside	
• Metadata	
• GPS	
• Drawing	
• Watch	
Summary	
	
• Date: 2016.03.08	
• Time: 00:00 ~ 02:02 (133 minutes)	
• The number of images: 263	
• GPS/Drawing: Yes/Yes	

Summary of Previous Research: Automated Visual Inspection

Automated visual inspection for large-scale civil structures

Image Scale Estimation for Quantitative Visual Inspection

Routine visual inspection is mandated to identify and quantify structural defects.

Technical Overview

Step 1.Image collection for target region

Step 2.Region-of-interest (ROI) detection

Step 3. Patch extraction of surface texture

Step 4.Image scale estimation using trained CNN model

Step 5. Quantitative ROI evaluation
